FY 2014 Per Capita Federal Spending on Major Grant Programs

Curtis Smith, Nick Jacobs, and Trinity Tomsic • 202-624-8577 • ttomsic@ffis.org

Summary

Per capita federal spending is one measure for states to assess how they fare in their fiscal relationship with the federal government. This analysis provides the most recent per capita figures, focusing on the 244 federal grant-in-aid programs tracked and included in FFIS's Grants Database. These grants account for more than 90% of total federal grants to state and local governments. The database primarily includes formula grants and does not capture many of the small competitive grants for which states compete.

This analysis provides per capita data for federal fiscal year (FY) 2014, using the Census Bureau's annual population estimates from July 2014. On average, the federal government spent \$1,969 per person on grants to state and local governments, ranging from \$4,994 in the **District of Columbia** to \$1,265 in **New Hampshire**.

Per Capita Analysis

A number of factors explain how states fare in federal grants. Medicaid alone accounts for about half of all state and local grant funding. Given its sheer size, it is the most important determinant of how much federal funds most states receive. States with a large federal presence also tend to rank high, as they receive significant federal funds based on the value of the natural resources extracted from their public lands. A state's demographics and the well-being of its population also play a large role since many federal grant allocations are determined by related formula factors. For example, states with a large share of low-income children tend to receive more education dollars.

As expected, highly populated states receive the most federal grant dollars because many formulas rely in part on population. States with relatively small populations tend to do well on a per capita basis because several grant formulas include small-state minimums. States with significant natural resources generally have fewer people. To further explain state rankings and the nuances among states, this analysis takes a detailed look at federal grants by major category and budget function. Very few states perform well across-the-board. Most rank high in some areas and low in others.

Total Funding. Table 1 provides total funding by state for the grants in the FFIS database between FYs 2009-2014. Overall, federal spending grew by \$112 billion (21.4%) over this period, driven in large part by a \$90 billion (40.9%) increase in Medicaid. **Nevada** (51.8%), **Oregon** (50.2%), and **Hawaii** (49.3%) experienced the largest increases. **New Hampshire** (0.7%) and **Wyoming** (0.2%) saw the smallest increases, while **Maine** (-2.7%) saw a reduction in federal grant dollars, largely attributable to Medicaid.

As expected, most states' rankings for total funding align closely with overall population rankings.

States Receiving Most/Least Federal Grants, FY 2014					
Rank	Top 10	Population Rank	Rank	Bottom 10	Population Rank
1	California	1	52	North Dakota	48
2	New York	4	51	South Dakota	47
3	Texas	2	50	New Hampshire	43
4	Florida	3	49	Vermont	51
5	Pennsylvania	6	48	Delaware	46
6	Ohio	7	47	Montana	45
7	Illinois	5	46	Wyoming	52
8	Michigan	10	45	Alaska	49
9	North Carolina	9	44	Nebraska	38
10	Georgia	8	43	Rhode Island	44

Per Capita Federal Spending. Table 2 compares per capita spending in FY 2009 and FY 2014. In FY 2014, overall per capita spending was \$1,969, an increase of 17% compared to FY 2009. The following states saw the largest growth in per capita federal grants: **Oregon** (44.1%), **Nevada** (43.6%), and **Hawaii** (41.6%). Nevada is the only one of these states to rank in the top 10 for population growth during the same period. **Wyoming** (-4.0%), **South Dakota** (-3.6%), **Maine** (-2.8%), **Louisiana** (-1.5%), and **New Hampshire** (-0.1%) saw reductions in per capita spending during this period. **Alaska**, **Louisiana**, **Maine**, **Montana**, **New Hampshire**, **North Dakota**, **South Carolina**, **South Dakota**, **Utah**, and **Wyoming** experienced population growth that outpaced increases in federal grants.

The least-populated states tend to rank the highest in per capita federal spending. **New York** is an exception, with Medicaid driving the results.

Per Capita Federal Spending, FY 2014					
Rank	Top 10	Population Rank	Rank	Bottom 10	Population Rank
1	District of Columbia	50	52	New Hampshire	43
2	Wyoming	52	51	Virginia	12
3	Alaska	49	50	Nevada	36
4	New Mexico	37	49	Utah	34
5	New York	4	48	Kansas	35
6	Vermont	51	47	Colorado	22
7	Rhode Island	44	46	Nebraska	38
8	West Virginia	39	45	Florida	3
9	Mississippi	32	44	Maryland	19
10	Oregon	27	43	Georgia	8

Per Capita Federal Spending by Type of Grant. Table 3 provides FY 2014 per capita federal spending by type of grant. These types include Medicaid, other state grants, grants to local governments, and grants that flow to individuals/others (such as Pell Grants and Supplemental Nutrition Assistance Program [SNAP] benefits). The results for states ranking in the top and bottom 10 are summarized below.

Per Capita Federal Spending by Type of Grant				
Rank	Medicaid	Other State	Local	Indiv./Other
Top 10				
1	District of Columbia	Wyoming	District of Columbia	District of Columbia
2	New York	Alaska	Alaska	Arizona
3	New Mexico	Puerto Rico	Hawaii	Hawaii
4	Vermont	District of Columbia	Puerto Rico	Mississippi
5	Rhode Island	North Dakota	New York	New Mexico
6	West Virginia	Montana	New Jersey	Oregon
7	Oregon	New Mexico	New Mexico	Tennessee
8	Arkansas	Vermont	Massachusetts	West Virginia
9	Kentucky	South Dakota	Montana	Alabama
10	Mississippi	West Virginia	Tennessee	Georgia
Bottom 10				
52	Puerto Rico	Virginia	Iowa	Wyoming
51	Virginia	Florida	New Hampshire	North Dakota
50	New Hampshire	Colorado	Wisconsin	New Hampshire
49	Utah	Maryland	Indiana	Nebraska
48	Wyoming	Nevada	South Carolina	New Jersey
47	South Dakota	Washington	Idaho	Kansas
46	Nevada	New Hampshire	Vermont	Minnesota
45	Nebraska	Arizona	Arkansas	Nevada
44	Kansas	Minnesota	Nebraska	Colorado
43	Florida	North Carolina	Florida	Virginia

The **District of Columbia** and **New Mexico** are the only jurisdictions to receive a top-10 ranking in all categories. At the other end, **New Hampshire** ranks in the bottom 10 for all categories while **Florida, Nebraska, Nevada, and Virginia** rank in the bottom for three.

Medicaid accounts for 48.7% of total funding per capita (in comparison, other state grants and local grants together account for 35.1%). In fact, the performance of many of the top-ranking states shown on Tables 1 and 2 can be explained by the amount of federal funding they receive for Medicaid. Some jurisdictions—such as the **District of Columbia, Mississippi, New Mexico, and West Virginia**—have a high federal Medicaid matching rate, which is calculated based on a state's relative per capita personal income (the District of Columbia's is set at 70% as part of the city's federal financing structure). Other states, most notably **New York**, receive a lower federal matching rate, but run a robust and/or expensive Medicaid program, which drives up federal reimbursements.

Per Capita Federal Spending by Function. Table 4 provides FY 2014 per capita federal spending by federal budget function. Sorting spending by function yields a number of interesting results:

- Health, social services, and income security programs represent 78% of per capita spending on selected grant programs.
- **Puerto Rico** is the only jurisdiction to receive less than \$500 per person for health programs.

- **Wyoming**'s large federal revenue from mineral leasing (shown in general government) offsets its bottom ranks in health, and social services and income security.
- Per capita federal spending on transportation ranges from \$70 in **Puerto Rico** to \$993 in **Alaska**.
- The **District of Columbia** receives more than three times the national average for justice programs while **North Dakota** receives more than five times the average for agriculture programs.
- **Alaska**, the **District of Columbia**, and **Puerto Rico** are the only jurisdictions to receive more than \$400 per person for education.
- **Alaska**, the **District of Columbia**, **Rhode Island**, **Vermont**, and **West Virginia** rank above average in most areas.
- **Maryland** and **Florida** rank below average in every function.

The table below highlights the states ranking in the top and bottom five for the various budget functions.

Per Capita Federal Spending by Budget Function, FY 2014					
Rank	Health	Income Security-Social Services	Education	Transportation	Energy, Environment, and Natural Resources
Top Five					
1	District of Columbia	District of Columbia	Puerto Rico	Alaska	Wyoming
2	New York	Puerto Rico	Alaska	Wyoming	Alaska
3	New Mexico	New York	District of Columbia	District of Columbia	Montana
4	Vermont	Hawaii	Arizona	Montana	West Virginia
5	Rhode Island	Mississippi	South Dakota	North Dakota	Tennessee
Bottom Five					
52	Puerto Rico	New Hampshire	Nevada	Puerto Rico	Florida
51	Virginia	Utah	Washington	Florida	California
50	New Hampshire	Wyoming	Maryland	Michigan	Texas
49	Utah	Colorado	New Jersey	Arizona	Georgia
48	Wyoming	Virginia	Virginia	North Carolina	Arizona
Rank	Employment and Training	Community-Regional Development	General Government	Justice	Agriculture
Top Five					
1	Alaska	District of Columbia	Wyoming	District of Columbia	North Dakota
2	Wyoming	Rhode Island	New Mexico	Alaska	South Dakota
3	District of Columbia	Vermont	Puerto Rico	Delaware	Wyoming
4	Puerto Rico	Puerto Rico	North Dakota	Wyoming	Vermont
5	North Dakota	Maine	Utah	Vermont	Montana
Bottom Five					
52	Utah	Florida	Rhode Island	Virginia	New Jersey
51	Hawaii	Colorado	New York	Kentucky	California
50	Iowa	Virginia	Connecticut	Ohio	Florida
49	Virginia	Arizona	New Jersey	Minnesota	Arizona
48	Oklahoma	Oklahoma	Maryland	Pennsylvania	New York

Full Database. An electronic Excel spreadsheet that accompanies this brief includes the detail behind the analysis. Specifically, it provides the same information as the summary tables, but for every program in the FFIS Grants Database. In addition, it contains key program information—such as the federal agency that administers the grant, type of funding, CFDA number, budget function, and authorizing legislation—to allow the user to manipulate the data. (This spreadsheet is made available only to full subscribers with access to the FFIS Grants Database.)
